

Cellorgane® 6

IMMUNE THERAPY

CLINICAL APPLICATIONS

- *Patients with Immunosuppression*
- *Acute infections in treatment*
- *Chronic infections Chronic*
- *Sinusitis*
- *Acute and chronic stress*
- *Aging.*

What is Cellorgane 6?

Cellorgane 6 revitalizes immune function by stimulating the production and performance of key immune cells, including lymphocytes, neutrophils, and macrophages. Its bioactive compounds modulate the immune response, reduce oxidative stress, and help prevent immune-related degenerative conditions.

It's particularly helpful for those with chronic infections, frequent illness, or immune suppression

Key Bioactive Compounds

- Immune-targeted biopeptides, antioxidant enzyme Complexes, and cellular repair cofactors.

Benefits

- Revitalizes immune cells
- Helps prevent degenerative immune conditions
- Promotes healthy lymphocyte, neutrophil, and macrophage activity
- Enhances systemic immune response

Highlights

- Contains homeotherapeutic cellular extracts from lung, thymus, placenta, and embryonic mesoderm
- Includes antioxidant enzymes to reduce oxidative stress and support immune resilience

Administration

Orally, consume before taking food to improve absorption, preferably with water in the morning.

Composition:

Boxes of 30 tablets of 650 mg. / Boxes of 60 tablets of 650 mg.

Each 650 mg tablet contains:

Opotherapeutic cell extracts: Thymus Gland, Bone Marrow, Spleen, Lymphatic Glands.

Peptide extracts of: Thymus Gland, Bone Marrow, Spleen, Lymphatic Glands.

Enzyme complexes: Superoxide Dismutase, Glutathione Peroxidase, Glutathione Reductase, Glutathione Transferase, Adenosine Triphosphate (ATP).

Other Ingredients: stabilizers and excipients.

- Opothherapeutic Cell Extracts: Thymus Gland

Result Observational Studies

Cellorgane® 6 - Immune Therapy

Results of observational studies for the indication of the treatment of the following medical parameters.

Preventive therapeutic action in patients with some genetic predisposition.

The therapeutic action as a primary treatment in patients with degenerative diseases that for several years were treated with conventional medicine and the expected results are not observed.

The therapeutic action as an adjuvant or reinforcement in the chaos of various pathologies combined with

Adjuvant Treatment

Physicians surveyed report that Cellorgane is instrumental in aiding the treatment and cure of disease.

Physical-mental energy levels

Almost all of the patients treated noticeably increased their physical and mental energy levels

Medical expertise

Medical professionals feel confident and supported when using a CELLORGANE treatment.

Immunosuppressive response

After a complete treatment with C-6 an immunosuppressive response is obtained in a large part of the treated cases.

Anti-aging

Cases of improvement in general physical appearance are reported after prolonged treatment.

Postoperative infections

The possibility of infections is limited in a large number of patients treated with Cellorgane 6.
